

TRANSITION TO E-MOBILITY AND ITS EFFECT ON CENTRAL EASTERN EUROPE (CEE)

CEE IS A MAJOR CENTER OF CAR PRODUCTION IN EUROPE

Northern & Western Europe

CEE

total EU car production

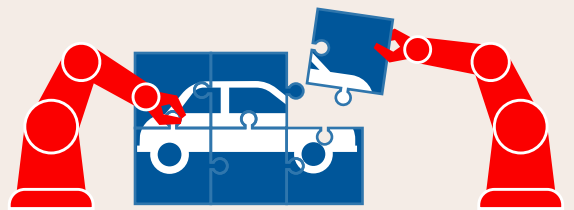

EU car production in CEE

The automotive sector directly provides **8.5% of all EU manufacturing jobs**, but **up to 16% in some CEE countries**.

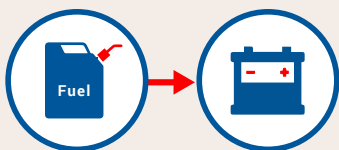

80% of jobs in the automotive industry in CEE is in parts and components, which is the segment of car manufacturing most affected by the transition.

WHY IS THAT A PROBLEM?

A transition to electric mobility is going on worldwide.

From 2035 on, there will be a **sales ban of combustion engine vehicles (CEV) in the EU**.
